September 2017

Dear Parents,

The Yonkers Police Department notifies schools when a former sex offender has been released to a residence in their area. The purpose of the notification is to allow schools to notify police and parole officers should the individual show up at a site where children gather (e.g. school, playground, etc.). The New York State Sex Offender Registration Act requires that inquiries be made by the general or on the Internet at <http://criminaljustice.state.ny.us/nsor/index.html>.

Please know that I have thoroughly informed all of our school's staff of this matter and they will notify me immediately should any suspicious individual be seen around our school's property. This is consistent with our normal practice in such matters.

To provide further for your child's continuing safety, please know that I have asked all teachers to spend some time this coming week on reviewing safety issues with the children, such as not approaching parked cars or talking to strangers. We plan to reinforce this especially with the younger grades.

I would appreciate your support in talking with your children about these important lessons in the next few days. If a child hears a consistent message between home and school, it is more likely to have a positive impact.

Sincerely,

A handwritten signature in black ink that reads "Mr. Michael Vicario".

Mr. Michael Vicario  
Principal
